

# JAI CHUPREECHA

**A LEVELS STUDIED: BIOLOGY, CHEMISTRY, MATHS AND EPQ**

**UNIVERSITY COURSES:** Medicine with integrated Master of Medical Sciences at the University of Southampton

**CURRENT ROLE:** Medical Student

**PLACE OF WORK:** University of Southampton/ University Hospital Southampton

I moved to the UK from Thailand and joined Trinity School in Year 7, where I quickly felt supported by both my teachers and peers. In Year 13 I received invaluable guidance from my teachers, which led to offers from prestigious Russell Group universities, including Southampton, Exeter, and Cardiff. This support played a pivotal role in shaping the path I am on today. Currently, I am in my fourth year of medical school, pursuing my passion for patient care and the academic aspects of medicine. In my third year, I conducted clinical research on preschool wheeze, which led to presenting at a national conference in London. This inspired me to pursue an integrated Master of Medical Sciences, dedicating an additional year to research in dermatology. Alongside my studies, I hold leadership roles, such as president of the dermatology society and year representative. I am excited to continue my medical journey, with two more years of medical school before becoming a doctor.
