Ever since I moved from Portugal with my family, Trinity was always a place where I felt like I belonged - even though I joined halfway through a school year and spoke a completely different language! The sense of community and belonging at Trinity school was reassuring and encouraging, and it helped me to grow into the individual that I am today. The range of subjects available to study at Trinity, activities, clubs and competitions, meant that I was always participating and broadening my horizons, as well as learning what I enjoyed and taking part in new events. Through the school's emphasis on personal excellence and collective responsibility, I am incredibly proud of where I am today with my education, as well as my professional journey.
